

Campey adds a new brand and new products to the line-up for BTME 2025

Campey Turf Care Systems is looking forward to BTME 2025 in Harrogate and will be showcasing a number of new products in addition to taking on a new brand to enhance the excellent range of machinery that is already synonymous with the Campey name and manufacturers such as Dakota, Vredo, Imants, Foley Air 2G2, Koro and Imants!

Now back in Harrogate at its usual time, the show will provide an excellent platform to introduce a new brand of equipment to Campeys, with a range of well-known, quality products which will compliment the current range perfectly!

Campey Director Lee Morgado explains: "We are delighted to be expanding the number of products we can offer to our customers.

For us, BTME gives us the option to focus on our golf related products and look at some of the issues specific to this field. Bringing machines and people together is the best way to assess the latest options and look into new maintenance practices they might have spoken about or seen on social media.

The new brand joins the staple industry favourites of machines from Omarv, Koro, New Holland, Vredo, Air2G2 Inject Campey and Imants, with new products from several of them to be launched at the show. To exhibit this bumper range of machinery, Campey has a stand 220 in Hall 2, which will have product specialists on hand to give expert advice and answer any questions you may have.

As one of the most popular events in the greenkeeping calendar, BTME will once again be a forum for turf professionals from across the world to come together and see what's new and renew relationships and create new contacts for the coming year.

Campey will be showcasing equipment covering everything from renovations and aeration to overseeding and utility vehicles. The machinery line-up will encompass every area of maintenance for golf including topdressing, covered by the industry leading Dakota range, and the effective TB220 and UniRake to complete the grooming line-up.

The combination of the Universe[®] Rotor and Vredo Super Compact, an increasingly popular duo for renovating tees, will be on display alongside Campey's all-electric products such as the AllTrec Tool Carrier featuring mowing, hedge cutting, weed brush, and burning attachments.

End - Words: 401
