

## PRESS RELEASE

### **Kubota to showcase versatile greenkeeping solutions at BTME on stand 624**

Kubota will be back BTME once again in January, joining Baroness on stand 624 to showcase the very best in Japanese excellence. Complementing an array of Baroness implements, pedestrian and ride on mowers will be models from across Kubota's RTV, mower and compact tractor range including the B2-261 and robust and versatile L2-622HST – the agile all-rounder that effortlessly tackles all maintenance tasks around the golf course.

Offering the highest rear lift capacity in its class, the Kubota L2-622 combines reliable technology and productivity with a high degree of operator comfort. At its heart is an efficient 62hp stage-V diesel engine, integrated power steering and HST hydrostatic transmission with three-stage group shift for smooth operation and complete control. Further flexibility is offered by a range of Kubota front loaders, extending its application to course renovation and end of season construction works.

Continuing the theme of versatility will be the RTV 520 from Kubota's utility vehicle range. The Kubota RTV 520 delivers quiet, dependable power from the 18hp liquid-cooled 2-cylinder engine for work on all terrain and the timely delivery of people and materials to meet the tightest of maintenance schedules. Its heavy-duty metal load platform, solid underbody protection and high front axle ground clearance of 225mm are proof positive that compact doesn't have to mean compromise when it comes to rugged productivity.

Completing the line-up will be a selection of ride-on mowers. Joining the highly productive FC3-261 out-front centre-collect mower will be the F-391 with 60" rear discharge deck. Renowned for its efficiency, Kubota's F-Series of front mower delivers rugged, diesel-powered reliability for the most demanding of mowing tasks. Comfortable ergonomics are complemented by

optimal cut and clipping dispersal, and equally impressive mulching quality. Available with either a 60 or 72" mower deck, and choice of side or rear discharge, the F-391 presents a versatile alternative for the cutting of long, dense roughs, practice areas and car park surrounds.

As always, the Kubota team will be on hand across the three days, happy to answer visitors' questions and looking forward to catching up with customers old and new.

ENDS

## About Kubota Corporation

Kubota has been a leading manufacturer of agricultural equipment, construction equipment, lawn mowers and industrial engines since 1890. With its global headquarters in Osaka, Japan, offices in more than 120 countries and more than 41,000 employees in North America, Europe and Asia, Kubota had a turnover of \$20 billion in 2021. Although agricultural, construction and turf equipment are its main product lines, Kubota also produces a wide range of products such as city water purification systems, irrigation systems, piping systems, roof and home construction, and large underground valves.

## Our Mission

Our mission "For Earth, For Life" speaks to our commitment to the conservation of the environment while aiding the production of food and water supplies, which are vital to meet the needs of our society, as the world's population continues to grow. This mission is accomplished every time a Kubota tractor harvests the land to produce food or when our construction equipment excavates to transport water or provide shelter.
