

## **Mansfield Sand's Turf Solutions at BTME 2024**

From January 23 to 25, 2024, Mansfield Sand invites you to explore Stand 242, where a comprehensive array of innovative products for sports, landscaping, and equestrian applications will take centre stage.

### **A Legacy of Innovation**

With a rich history spanning over 170 years, Mansfield Sand has consistently pioneered the development and production of premium silica sand-based products. As the market leader, the company has supplied its high-quality solutions to some of the most prestigious sporting venues across the UK and Europe.

### **The Mansil Silica Sand Sports Range**

Step into the world of Mansil Silica Sand Sports Range, sourced from the Two Oaks Quarry in Mansfield. These silica sands play a pivotal role in constructing and maintaining various sports surfaces, including winter sports pitches, golf courses, bowling greens, and amenity turf areas.

### **Tailored Solutions for Fine Turf**

Mansfield Sand's Soil Top Dressing, crafted for the fine turf market, is a homogenous product made from premium silica sands and top-quality soils. Sterilised and screened to a 3mm size, this dressing is easy to spread, stone-free, and pebble-free. Mansfield Sand also offers bespoke dressing blends and the flexibility to incorporate soil amendments into any product.

### **Precision in Rootzone Blends**

Understanding the demands of turf managers, Mansfield Sand's rootzones are crafted with only the highest-quality materials. Whether for renovation or construction, the Mansil 40 Silica Sand, blended with quality screened topsoil, ensures the perfect start for a flawless surface.

### **Sand Compost Rootzones for Sustainability**

Mansfield Sand boasts a range of premium sand-organic material blends, ideal for creating rootzones requiring organic-rich profiles. These blends aid in nutrient retention and enhance drought resistance, contributing to sustainable turf management practices.

### **Reinforced Rootzone Technology**

To meet the rigorous standards of the sports turf industry, Mansfield Sand offers a range of reinforced rootzones. Featuring technologies like polypropylene fibres and flexible elastane fibres, these solutions provide stability and durability, ensuring consistent drainage and performance.
